EDUCATION

Carnegie Mellon University

Bachelor of Science in Statistics and Machine Learning

Additional Major in Artificial Intelligence | Dean's List w/ High Honors

Pittsburgh, PA

Aug. 2024 - May 2028

Relevant Coursework: AI/ML 1, Parallel & Sequential Data Structures/Algorithms, Principles of Imperative Computation, Intro to Functional Programming, Matrices and Linear Transformations, Statistical Computation, Statistics Graphics & Visualization, Great Ideas in Theoretical CS

Skills: Python (Pandas, Numpy, Matplotlib), ML Libraries (PyTorch, TensorFlow), C/C++, R, SML, Claude Code, AWS AI Practitioner Certification

EXPERIENCE

Enterprise Technology Engineering Intern

Remote

State Farm

June 2026 - Aug. 2026

- Using SQL & Power Platform to automate data workflows and build dashboards for stakeholders
- Exploring AWS Services (Bedrock, DynamoDB) to build new apps addressing team problems
- Identifying opportunities to leverage AI tools to enhance team efficiency
- Collaborating with team members to gain experience working in a professional environment

Effective Coding with AI (15-113) Teaching Assistant

Pittsburgh, PA

Carnegie Mellon School of Computer Science

Jan. 2026 - Present

- Spearheading new course designed to teach students to integrate AI into their project workflow to build cool apps
- Experimenting with different techniques with students such as RAG, multi-agent workflows, and the newest technology to teach useful and applicable skills for industry
- Designing assignments, grading weekly projects, hosting office hours, and teaching lectures on interesting topics

Undergraduate Statistics Ambassador

Pittsburgh, PA

Carnegie Mellon Statistics and Data Science Department

Aug. 2025 - Present

- Acting as liaison between 300+ undergraduate Statistics students and the Stat faculty/advisors
- Provide peer guidance to students about coursework, internships, research, and more
- Plan/host bimonthly events (cocurricular & social) to help students and strengthen community

Fundamentals of Programming and Computer Science (15-112) Teaching Assistant

Pittsburgh, PA

Carnegie Mellon School of Computer Science

June 2025 - Dec. 2025

- Served on staff of intro Python computer science to teach 300+ students fundamental programming skills and computer science topics
- Led weekly recitations of ~25 undergraduate/graduate students to consolidate lecture material and work through problems
- Increased student engagement through weekly office hours and quiz/exam prep sessions
- Helped organize a hackathon for 100+ students to show the skills they learned through the course

PROJECTS

OneSource | AWS Bedrock, S3, Lambda, DynamoDB, Claude Code, Application Design

State Farm HackDay

- Identified bottleneck in team workflow process in maintaining and updating requirements
- Fine-tuned Nova Pro model on AWS Bedrock to automate requirement and story generation
- Created a centralized platform to connect different requirement sources to streamline workflow
- Used Claude Code to plan, test, and build the entire project in under 10 hours

***-timeline** | Claude Code, Application Design, SQL Database, Figma

TartanHacks Hackathon

- Designed an AI-free artist portfolio and social platform for creators to share their work, connect with other artists, and build a community that values human creativity over AI-generated content
- Implemented features for AI detection, photo/text uploading, thread system, and user engagement
